

Committed to helping people live an active and pain-free life.

Oska Wellness Inc is a company committed to the development of health and wellness technology that assists people suffering from pain to live a more active, pain-free life.

We believe that people suffering from pain deserve relief without the side effects of pain medication. Our revolutionary Oska Pulse uses innovative, technology that optimises the effectiveness of Pulsed Electromagnetic Field (PEMF) Therapy, which is similar to PEMF therapies used in many clinical applications that accelerate the body's ability to recover naturally.

The science and technology behind the Oska Pulse, originally designed and engineered in Western Australia has been refined, developed and manufactured in the USA by a team of

respected scientists and researchers with over 25 years of experience in engineering health and wellness technologies to treat pain.

What leading US pain management specialists have to say about the effectiveness of Oska Pulse:

“At least 70% of my patients who used the Oska Pulse product across a variety of chronic pain profiles found relief. This is a real non-drug pain relief solution.”

Dr. Joseph Shurman Chairman of Pain Management and Co-Chair Palliative Care Scripps Memorial Hospital, La Jolla, California

“I recommend it to my patients. We have found Oska Pulse to be helpful with a variety of musculoskeletal acute and chronic pain conditions. It is non-invasive and easy to use.”

Dr. Mark Wiederhold, President Virtual Reality Medical Center, San Diego, California

“I love your device. I have shared it with some of my more difficult patients and found Oska Pulse helpful, including patients with neuropathic pain. I think Oska Pulse will help a lot of people.”

Dr. Lawrence Lavery, Medical Director, UT Southwestern (UTSW), Comprehensive Wound Care Center, Texas

DRUG-FREE PAIN RELIEF

OSKA

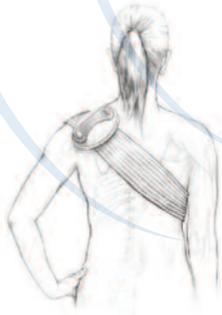

www.oskawellness.com

Portable, non-invasive and easy to use!

Most pain management solutions simply block the pain. Oska Pulse mimics the natural electric signals produced by the body to promote recovery. A small, portable hands-free device it provides drug-free relief for knee, back, joint, nerve or chronic pain.

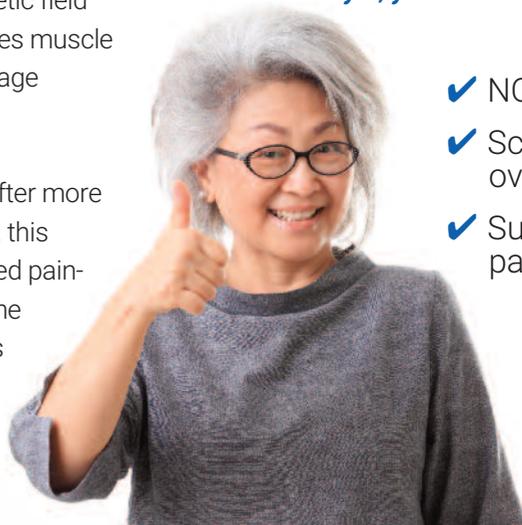

This innovative product was recently honoured at the USA's prestigious annual Medtech Breakthrough Award for electronic innovation, where it beat products from Apple and other established tech companies.

Using optimised pulsed electromagnetic field technology (PEMF), Oska Pulse relieves muscle stiffness and inflammation to encourage recovery at a cellular level.

It has no side effects and, after more than 50 years in the market, this science behind this advanced pain-treatment technology has the support of some of the US's leading pain specialists.

▶ PROMOTES RECOVERY

Most pain management solutions simply block the pain. Oska Pulse mimics the natural electric signals produced by the body to promote recovery.

▶ PORTABLE

A small, portable hands-free device that provides drug-free relief for knee, back, joint, nerve or chronic pain.

▶ EASY TO USE

Oska Pulse starts with a simple push of a button and a handy USB cable makes charging easy.

Try it, you have nothing to lose but your pain!

- ✓ NO side effects.
- ✓ Science of PEMF in use for over 60 years.
- ✓ Supported by leading U.S. pain management specialists.
